Solarflex

The ***revolutionary*** solution for **faster**, **safer** installations

pvconnections.com.au

Powered by PV connections

Solarflex

The **hard work** is already done.

Pre-wired solar conduit systems proven to reduce time and wastage.

SolarFlex is a **revolutionary solution** exclusively designed and produced by PV Connections.

This **pre-wired flexible conduit** system removes the need to manually feed cables, enabling fast and easy solar installations.

Safe, fully compliant and self-extinguishing, **SolarFlex reduces installation time by up to 20%.**

Made in Italy to the highest Australian standards, the SolarFlex one-piece fittings and ready-to-go conduit systems give you complete confidence in your installation. Fit once, knowing that safety and reliability is maximised, and risk and maintenance is minimised.

PV connections

Exclusive to PV Connections

PV Connections is redefining the Australian solar industry with our uncompromising focus on safety and quality. We take a smarter approach to solar installations, sourcing better products from around the world, and developing new innovations, like SolarFlex, to solve real industry problems. PV Connections makes your life easier and safer.

UV Resistant for enhanced durability
